BOLLING MILL

Of Detroit Steel Company Destroyed by Fire.

DETRÔIT, Mich., Feb. 25.—A fire, which started to-night in the plant of the Detroit Steel and Spring Company's works, at the Michigan avenue crossing of the Michigan Central railroad, stroyed both the company's rolling mills and caused a loss of a fireman's life, besides indirectly resulting in injuries to a physician and an ambulance driver. The property loss is about \$100,-000, fully insured.

The blaze started from an unknown cause in the rolling mill's engine room. The double rolling mills building, 400x 120 feet in size, was destroyed, but the fire did not communicate to the Spring shops. Fireman Timothy Keohane, of Truck No. 4, was standing in Hubbard avenue, when an eighty foot iron stack fell across the street, striking and killing him instantly. A Harper hospital ambulance runnig to the scene, collided at Fourteenth avenue and Ash street with a swiftly running electric car. The ambulance was smashed to pieces and its occupants, Driver Frank Bertheaur and Dr. J. T. McKittrick, were badly bruised and shocked.

DeWitt Loomis, general manager of the steel and spring company, said that the spring shops will be operating within ten days and that the rolling mills will resume in a month if the company can secure the necessary buildings.

State bonds inactive. Railroad bonds irregular. The most notable feature of today's feverish and excited stock market was the fact that the railroad department apparently succeeded in breaking away from the influence of the industrials and specialties and differentiating the undeniable ele-ments of strength in that department from the demoralization and weakness in the other. The railroads succumbed in the early dealings to the sympathetic influence of the violent declines amongst the industrials, but during the day a confident demand sprang up for a number of railroad stocks lifted the whole level of that depart-ment materially above Saturday's close. So far as the news of the day went, it shed little light on the extrem ness of a number of the industrials.
The movement had all the appearance of a sort of duel between powerful contending interests and there are circumstances tending to confirm explanation of the movement. A relong of Third Avenue stock are thriftily availing themselves of the unsettling influence of the weakness in this stock to make a bear turn in other stocks. That bitter animosities and rivalries are involved is also a current reminder in the street, the same potential entities coming into play as dur-ing the panic of last December. Sugar's total fall was 7%, and it closed practically at the lowest. Tennessee Coal and the Tobacco stocks also showed notable weakness. Except in Su-gar, there were violent railies from time to time, reflecting the demand from the bears to cover shorts. The strength of the railroad stocks was based upon the substantial ground of increased earnings. A large number of returns were made during the day, all snowing very striking gains over the corresponding period of last year. For the last week in February the most
